EDUCATION

Concordia University

Montreal, QC

Bachelor of Engineering in Software Engineering (Co-op)

Sep. 2022 – May 2027

- **Relevant Courses:** Computer Architecture, Data Structures & Algorithms, Operating Systems, Artificial Intelligence, Deep Learning, Databases, Object-Oriented Programming

EXPERIENCE

Software Developer Intern

Jan. 2026 – Aug. 2026

Ericsson

Montreal, QC

- Modernized a **5G** network-slicing microservice using **Docker** and **Kubernetes**, migrating **10+** core components from **C++** to **Go** while achieving **99%** unit test coverage.
- Implemented fault management with **Kafka** telemetry, then designed and validated **130+** Robot Framework tests to achieve a **100%** passing rate.
- Assumed **Scrum Master** responsibilities after a team reorganization, leading daily stand-ups and sprint planning while removing blockers for teammates.

Software Developer Intern

May 2024 – Aug. 2024 & May 2025 – Aug. 2025

The CSL Group Inc.

Montreal, QC

- Engineered ETL pipelines using **Python**, **SQL**, **Databricks** & **Azure DevOps** to migrate **30M+** real-time shipment records into **Snowflake**, cutting runtime by **60 minutes**.
- Automated the migration of **10K+** SharePoint records into Databricks and resolved dataset mismatches to reconfigure and validate **12** Power BI dashboards.

Frontend Developer Intern

Sep. 2023 – Dec. 2023

Ubisoft

Montreal, QC

- Translated design specifications into **HTML**, **CSS**, & **AMPscript** templates in **Salesforce** Marketing Cloud for CRM campaigns supporting **7+** major Ubisoft releases.
- Architected reusable email components and localization templates to support scalable campaign development across international markets.

Software Developer Intern

Apr. 2022 – Jul. 2022

Categen Ventures

Montreal, QC

- Built a POS Delivery System from the ground up, translating **Figma** designs into features for authentication, restaurant layouts, reservations, takeout, orders and customer management.
- Developed mobile interfaces in **Dart/Flutter**, adding lazy loading and skeleton screens to improve **UI/UX**.

PROJECTS & HACKATHONS

Babbli

2026

- Won **4** awards at **Hack the Hill III** as a solo developer: **3rd Place (General Challenge)**, **Best Use of ElevenLabs**, **Best Educational Project** & **Best UI/UX**.
- Built a language-learning simulator with **TypeScript**, **React**, **Next.js** & **ElevenLabs** for AI-powered conversations in English, French, Spanish, Mandarin, Korean & Japanese.
- Engineered deterministic AI agents that support **17+ quintillion** conversations verified by **1,600+** automated tests.
- Built speech analysis that scores learners based on **5** skills, including speaking pace, vocabulary and filler words.

GitToCampus

2026

- Led development of a mobile campus navigation app built with **React Native**, **TypeScript**, and **Expo**, translating **Figma** mockups into mobile UI.
- Implemented classroom navigation using **Dijkstra's algorithm**, processed **GeoJSON** coordinates data and integrated **Google Maps** and **Google Calendar** for campus routing.
- Served as **Technical Lead** for an 11-member Agile team and awarded **first place** in the cohort by the professor.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Python, Java, C++, SQL, C#, Dart, Kotlin

Frontend & Mobile: React, React Native, Expo, HTML/CSS, Flutter

Backend & Infrastructure: Node.js, Express.js, REST APIs, Kubernetes, Docker, Kafka, Linux, CI/CD

Cloud & Data: AWS, Microsoft Azure, Databricks, Snowflake, PostgreSQL, SQL Server, MySQL, MongoDB, GraphQL

Developer Tools: Git, GitLab, Gerrit, Jenkins, SonarCloud, Jest, Postman, Agile/Scrum
