EDUCATION

Concordia University

Montreal, QC

Bachelor of Engineering in Software Engineering (Co-op)

Sep. 2022 – Present

- **Relevant Courses:** Computer Architecture, Data Structures & Algorithms, Operating Systems, Artificial Intelligence, Deep Learning, Databases, Object-Oriented Programming

EXPERIENCE

Software Developer Intern

Jan. 2026 – Aug. 2026

Ericsson

Montreal, QC

- Developed fault management logic in **Go** for a **5G microservice** containerized with **Docker** and deployed on **Kubernetes**, handling **6** raise/clear alarm events across **3** fault conditions and publishing fault telemetry to **Kafka**.
- Refactored and migrated **10+** service components from **C++** to **Go**, implementing custom JSON serialization, bitmask-based policy evaluation, and TAI group lookup logic while achieving **99%** code coverage in **SonarCloud**.
- Assumed **Scrum Master** responsibilities after a team reorganization, leading daily stand-ups and sprint planning while removing blockers for teammates.

Software Developer Intern

May 2024 – Aug. 2024 & May 2025 – Aug. 2025

The CSL Group Inc.

Montreal, QC

- Built scalable ETL pipelines using **Python** and **SQL** across **Databricks**, **Snowflake**, **Azure**, and **SQL Server** to migrate **millions** of production shipment records for maritime logistics operations.
- Migrated **10,000+** XREF records and **10+** Power BI datasets into Databricks, standardizing data sources and reducing **Azure DevOps** workflow runtime by **60 minutes** per run.

Frontend Developer Intern

Sep. 2023 – Dec. 2023

Ubisoft

Montreal, QC

- Developed responsive **HTML/CSS/JavaScript** templates with **AMPScript** and **Salesforce** Marketing Cloud for batch, lifecycle, and real-time customer campaigns.
- Implemented reusable content components for localization, improving maintainability and consistency across international marketing campaigns.

Software Developer Intern

Apr. 2022 – Jul. 2022

Categen Ventures

Montreal, QC

- Translated requirements into **Figma** mockups and built new mobile interfaces in **Flutter** for a point-of-sale app.
- Built new features in **Dart**, quickly ramping up on the language and the macOS environment within the first week.

PROJECTS

TransitOps Montreal

Jul. 2026 – Present

- Building a full-stack transit operations dashboard using **Go**, **React**, **TypeScript**, **PostgreSQL**, and **public GTFS data** to analyze STM bus route health from live or simulated vehicle snapshots.
- Implementing ingestion and metrics logic to detect active vehicles, stale updates, route gaps, and bus bunching risk.
- Designing an **LLM operations analyst** that recommends service actions from route telemetry using an agentic loop.

GitToCampus

Jan. 2026 – Apr. 2026

- Led development of a mobile campus navigation app built with **React Native**, **TypeScript**, and **Expo**, translating **Figma** mockups into mobile UI.
- Implemented classroom navigation using **Dijkstra's algorithm**, processed **GeoJSON** coordinates data and integrated **Google Maps** and **Google Calendar** for campus routing.
- Served as **Technical Lead** for an 11-member Agile team and awarded **first place** in the cohort by the professor.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Python, Java, C++, SQL, C#, Dart, Kotlin

Frontend & Mobile: React, React Native, Expo, HTML/CSS, Flutter

Backend & Infrastructure: Node.js, Express.js, REST APIs, Kubernetes, Docker, Kafka, Linux, CI/CD

Cloud & Data: AWS, Microsoft Azure, Databricks, Snowflake, PostgreSQL, SQL Server, MySQL, MongoDB, GraphQL

Developer Tools: Git, GitLab, Gerrit, Jenkins, SonarCloud, Jest, Postman, Agile/Scrum
